The Antelope contrib CVS repository

How to download / create a sandbox:

```
mkdir sandbox
setenv CVSROOT glennt@epicenter.ucsd.edu:/opt/antelope/cvs
setenv CVS_RSH ssh
cd sandbox
cvs checkout contrib
password is i*8
```

How to login to remote account:

```
ssh -l glennt epicenter.ucsd.edu
```

How to update after not using it a while:

```
cd sandbox/contrib
cvs update
```

How to add projects:

```
cd export
mkdir db2kml
cvs add db2kml
cd db2kml
(create db2kml.1, db2kml.pf, Makefile, db2kml.xpl etc)
cvs add db2kml.1 db2kml.pf Makefile db2kml.xpl
cvs commit
```

How to modify projects:

```
cd contrib/bin/export/db2kml
(put new files there)
cvs add db2kml.xpl
(delete old files)
cvs remove foo.bar
cvs commit
```

Test:

```
cvs update
make
make install
```
